

MetaPrint™

For Your Shop

For Your Shop

MetaPrint is the ultimate reprographics shop tool. With it, you can:

- Configure disparate file formats into a single job
- Set page size
- Set image alignment and rotation
- Scan directly into MetaPrint
- View how finished prints will look
- Use and display any number of preconfigured pen sets or use embedded pens
- Submit the job to shop floor printer queues

With MetaPrint Server, printer operators:

- Quickly route work to devices
- Easily open, view, and modify jobs
- Closely monitor device paper quantities
- See device status and work load
- View queue dates, job names and numbers

Advanced Functions:

- Optimize production efficiency by operating printers at top speed and capacity
- Fine pen control can easily be saved and recalled on a per-document basis
- Create and recall stamps to include job information: job name, company name, date, time and more
